V. Water Supply

1. The district including the Town Quay and Richborough Wharf is supplied by the Thanet Water Board main's supply being water from deep chalk wells, chlorinated and gravity fed to the area.

3. The Town Quay hydrant is protected and the fitment supplied as required to protect against abuse.

Pfizers Quay, Richborough is in private ownership, and has mains to tap supply.

4. No Water Boats use the area.

VI. 1. A list of the infected areas is maintained and revised at the Medical Officer of Health's Canterbury Office on the basis of the Weekly Epidemiological Record. Revisions are sent to the Chief Public Health Inspector Sandwich, Customs Ramsgate (Manston) and R.A.F. Medical Officer Manston, Ramsgate.

2. There is no arrangement for radio pratique.

3. As all ships pass through the Ramsgate Custom's area pratique is considered on a declaration of health presented to Ramsgate Customs on first contact.

The Medical Officer of Health is in touch with Customs Ramsgate through these and other duties (Aircraft Manston, Eastry R.D.)

4. There is now no declared mooring station on the River, that part of Richborough Wharf previously designated being inserviceable. The arrangement is to apply controls where berthed.

5. (a) Infectious Diseases Hospital - Haine Isolation Hospital Ramsgate

(b) Surveillance and follow-up of contacts will be arranged as required through Medical Officers of Health of destination. No passenger traffic occurs.

(c) Gaseous disinfection can be provided for disinfection of ships.

Cleansing of persons would be carried out on board ship. There is now no cleansing station or bath house in the Borough.

Steam disinfection is available at Haine Isolation Hospital.

VII. 1. Smallpox cases are taken to the Rivers Hospital, Long Reach, Dartford.

3. The Town Gey Hydrant is protected and the fittings supplied as required to protect against abuse.

4. The Water Boats are the area.

1. A list of the infected areas is maintained and revised at the Medical Officer of Health's Office on the basis of the Weekly Epidemiological Record. Notifications are sent to the Chief Public Health Inspector, District, and the Medical Officer, District.

2. There is no arrangement for radio practice.

3. As all ships pass through the Mangalore Harbour, a strict practice is maintained as a declaration of health presented to the Harbour Master on first contact.

The Medical Officer of Health is in touch with the Harbour Master through these and other duties (District, District, District).

4. There is now no declared working station on the River, but part of the Mangalore Harbour is previously designated being infectious. The arrangement is to apply controls where needed.

5. (a) Infectious Diseases Hospital - Main Isolation Hospital, Mangalore  
(b) Surveillance and follow-up of contacts will be arranged as required through Medical Officers of Health of

destination. No passenger traffic occurs.  
(c) General disinfection can be provided for disinfection of ships.

Disinfection of persons would be carried out on board ship. There is now no cleaning station or bath house in the

Harbour.  
Steam disinfection is available at Main Isolation Hospital.

1. Smallpox cases are taken to the Rivers Hospital, Long Beach, District.

2. The Canterbury Ambulance Station provides a Smallpox Ambulance and crew and these men are kept up to date in their vaccinal state.  
arrangements have been made for the use of the Ramsgate Public
3. Smallpox Consultant is Dr. J. P. Marsden, Rivers Hospital Dartford 23231 or 22443.  
death special arrangements would be made for removal with disinfectant precautions.
4. Laboratory diagnosis of Smallpox through the Public Health Laboratory Service, Maidstone or Colindale.
- VIII. Venereal Diseases clinics are held in Ramsgate, Margate and Dover and details of clinics and times are displayed in the Public Health Department, Guildhall, Sandwich and in public conveniences.
- IX. There were no cases to report under table D in 1961.
- X. No cases of malaria occurred in the ships using the port.
- XI. No measures were taken against plague as no black rats have been identified.
- XII. 1. Ships from foreign ports are visited and rat certificates checked. Inspections are carried out on suspicion of infestation.
2. The Public Health Laboratory, Maidstone would be used for rat examination.
3. The district is not approved for de-ratting.
- Table E - nil  
Table F - not applicable.
- XIII. Twenty four ships were visited for routine inspection. No detailed rat surveys were carried out and it was not found necessary to serve notice on any owners.
- XIV. There are no shellfish layings in the Port Health district. Cockles are gathered outside the district in Sandwich Bay (Eastry R.D.C.) but not on a commercial basis.
